*The performance data quoted represents past performance. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares upon redemption may be worth more or less than their original cost. The performance quoted does not reflect a 1% redemption fee on shares redeemed within 30 days of purchase. Returns would have been lower if certain expenses had not been reduced or reimbursed. Current performance may be lower or higher than the performance quoted here. To obtain performance current to the most recent month-end, please call 877-974-6852.*

The S&P 500 Total Return Index is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market. Returns for the S&P 500 Total Return Index include the reinvestment of income and do not include transaction fees, management fees or any other costs. The S&P 500 Value Total Return Index is a market-capitalization-weighted index composed of large-capitalization U.S. equities that exhibit value characteristics. The performance and volatility of the fund will be different than those of the indexes. The indexes are unmanaged and investors cannot invest directly in the indexes.

## INVESTMENT PROCESS

- The Co-CIOs and their team of equity analysts employ Gotham's proprietary analytical framework to evaluate stocks within the coverage universe on measures of absolute and relative value.
- Gotham's equity research and risk controls are used to select long stock portfolios from primarily the S&P 500 universe.
- The portfolio is rebalanced daily to weight most heavily those stocks priced at the largest discount to Gotham's assessment of value.
- In general, as a company appears cheaper, its weight in the portfolio increases.
- Risk for the fund is managed by limiting concentration in any one company, industry or sector. In addition, position sizes are managed such that the portfolio does not deviate too much from the underlying index over annual periods.

## IMPORTANT INFORMATION

Mutual fund investing involves risks, including possible loss of principal. It is anticipated the fund will frequently adjust the size of its positions and thus may experience high portfolio turnover which may increase brokerage costs.
